Introduction

Thank you for using NoteBurner Music One!

As a professional all-in-one streaming music downloader, NoteBurner Music One for Mac is capable of converting music from Spotify, Apple Music, Amazon Music, Tidal, YouTube Music, Deezer, Pandora Music, Line Music, YouTube, SoundCloud, Dailymotion, Vimeo, and Veoh. With an advanced conversion core, this tool supports batch downloading them to MP3/AAC/WAV/FLAC/AIFF/ALAC at 10X faster speed. It not only outputs songs at lossless audio quality but also keeps the ID3 tags of each music file, such as its title, artist, album, artwork, and the like.

Of course, NoteBurner Music One also packs dual conversion modes: App Mode, Web Mode, and Record Mode The program works like a charm, no matter which one you choose. After music conversion, it's convenient to personalize the tracks with built-in audio tools, including a format converter and tags editor.

Purchase & Registration

- Purchase License
- Registration Tips

Purchase NoteBurner Music One for Mac

Quick Link: To purchase a license key for NoteBurner Music One for Mac, click here.

1. Why should I buy NoteBurner Music One for Mac?

NoteBurner Music One for Mac is a subscription-based program. You can only convert the first **1 minute** of each audio with the free trial version. A licence key is required to unlock the limitation. Once your payment has been made successfully, you will receive an email with your registration ID and product key to the full version.

2. How can I benefit from purchasing a license?

  - Full music conversion from all supported streaming music platforms.
  - FREE technical support.

Register NoteBurner Music One for Mac

Step 1: Launch NoteBurner Music One on your Mac. A clean and concise user interface will then be displayed.

Step 2: Please click the "**Register**" icon (on the bottom left). There will be a registration popup dialog, where you can copy and paste the registration email and license code.
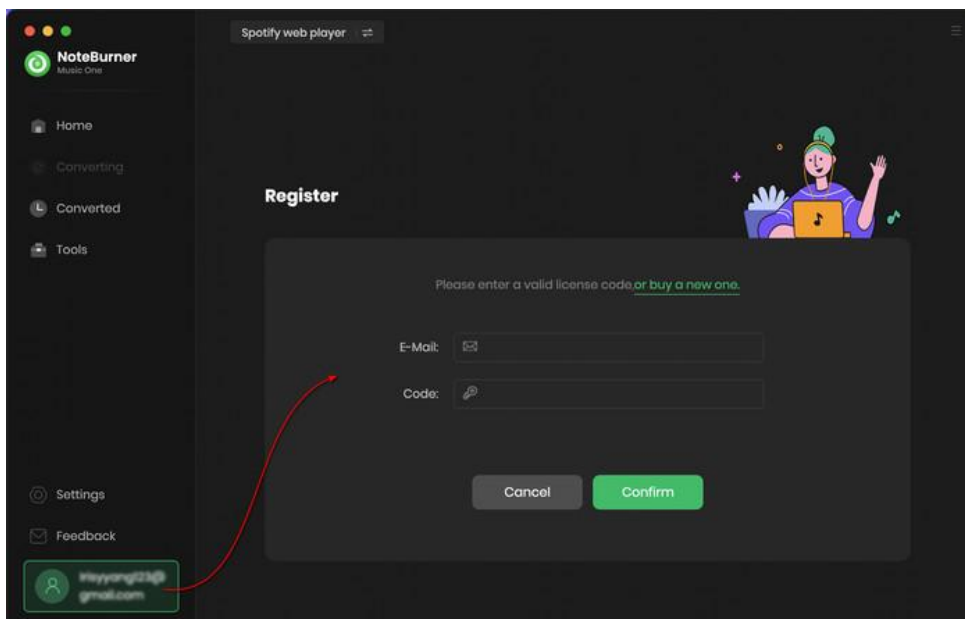

Notice:

1. Please ensure a constant internet connection is in place before launching the program.

2. Please make sure you've purchased a correct license to unlock the limitations of the trial version. You can't use the license for Windows to activate the Mac version.

3. The registration information is case sensitive. Please do not add blank at the beginning or at the end of the registration e-mail and code.

Tutorials

- Choose Music Service and Download Mode
- Adjust Convert Settings
- Add Music from Web Player to NoteBurner
- Start Music Conversion
- Find Converted Songs
- Edit ID3 Tags
- Convert Formats of Local Audios
- Convert AA/AAX Audiobooks

**Choose Music Service and Download Mode**

Run NoteBurner Music One program on your Mac. Then choose the target music platform and recording mode. Let's choose "**Spotify Webplayer**" as a example.
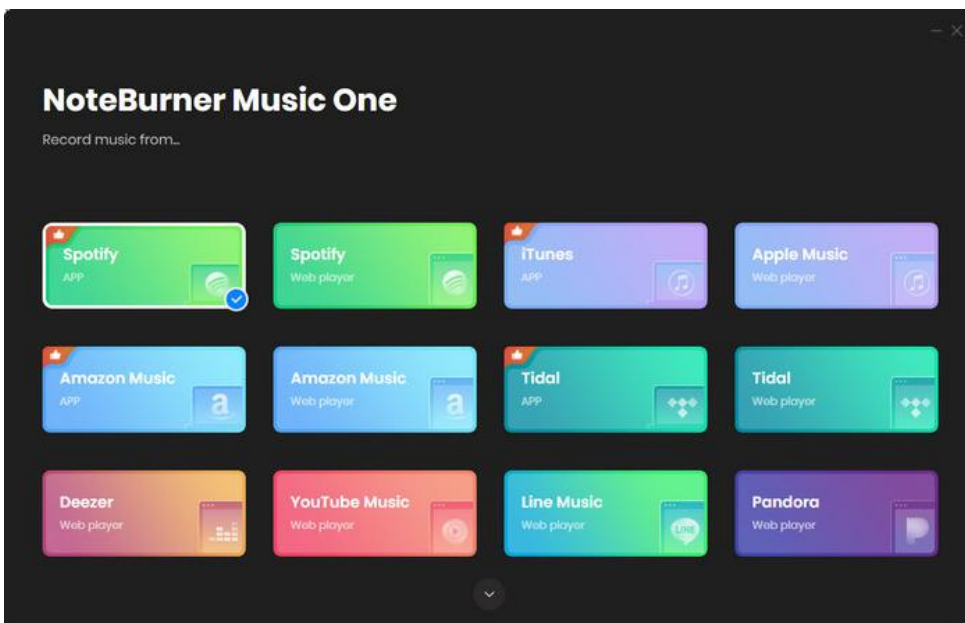

Later, the Spotify web player will then pop up automatically. Please first sign in to your Spotify Free or Premium account.

Adjust Convert Settings
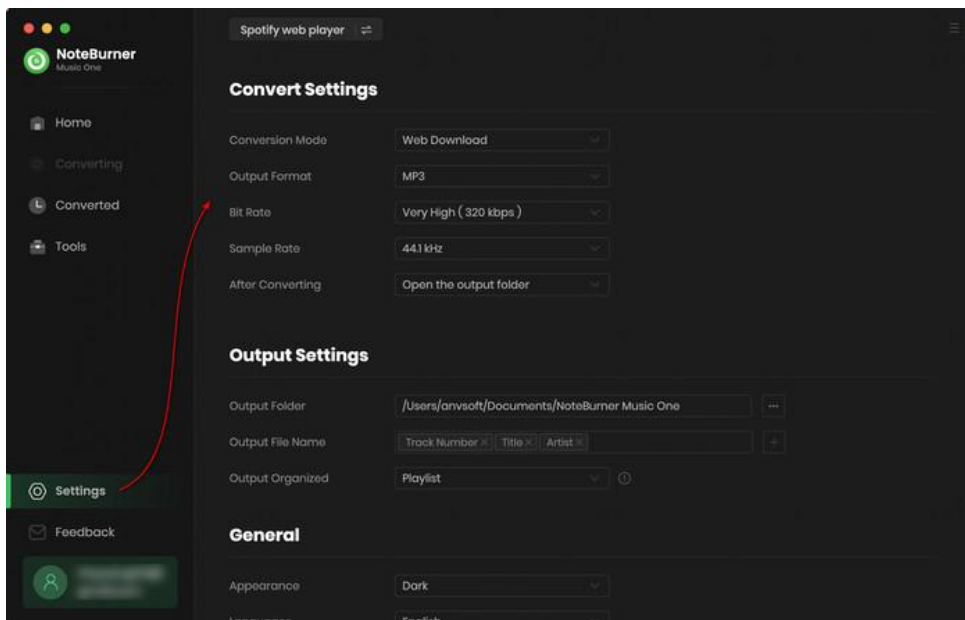

Click the ⊙ Settings icon on the bottom left. In the Settings, you can select Output Format (AUTO/MP3/AAC/WAV/FLAC/AIFF/ALAC), Bit Rate (320kbps, 256kbps, 192kbps, 128kbps), Sample Rate, Output Folder, Output File Name, and more.
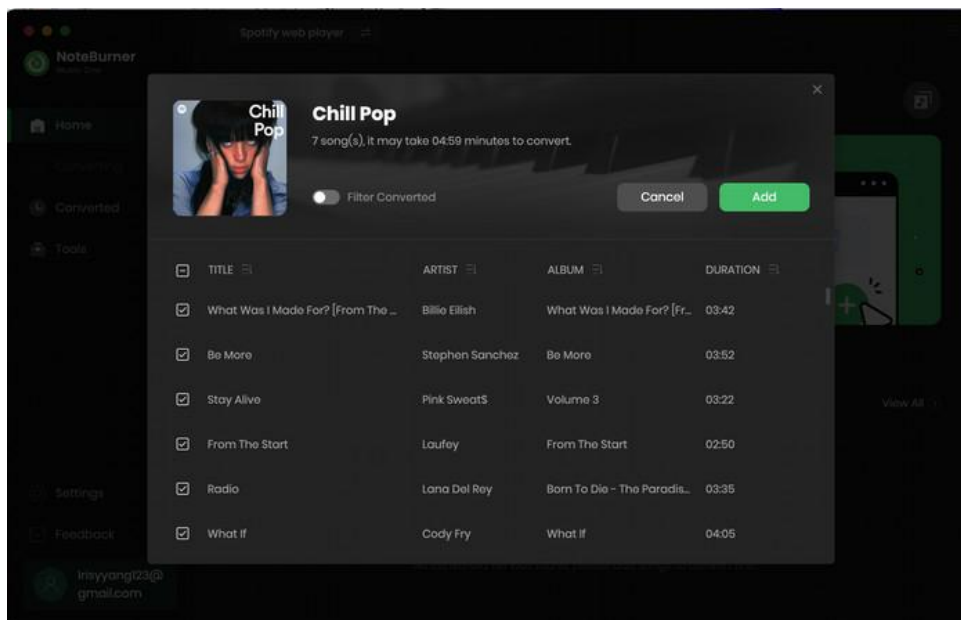

Add Music from Web Player to NoteBurner

Open your preferred playlist, artist, or album, then tap the [icon] icon at the bottom right corner. When you finish ticking songs, just click the **"Add"** button.
Start Music Conversion

Click the **"Convert"** button and the program will start the conversion process immediately. If you'd like to continue adding other albums or playlists, click "**Add More**" button on the "**Converting**" interface. While "**Delete All**" option will help you delete wrongly selected songs.
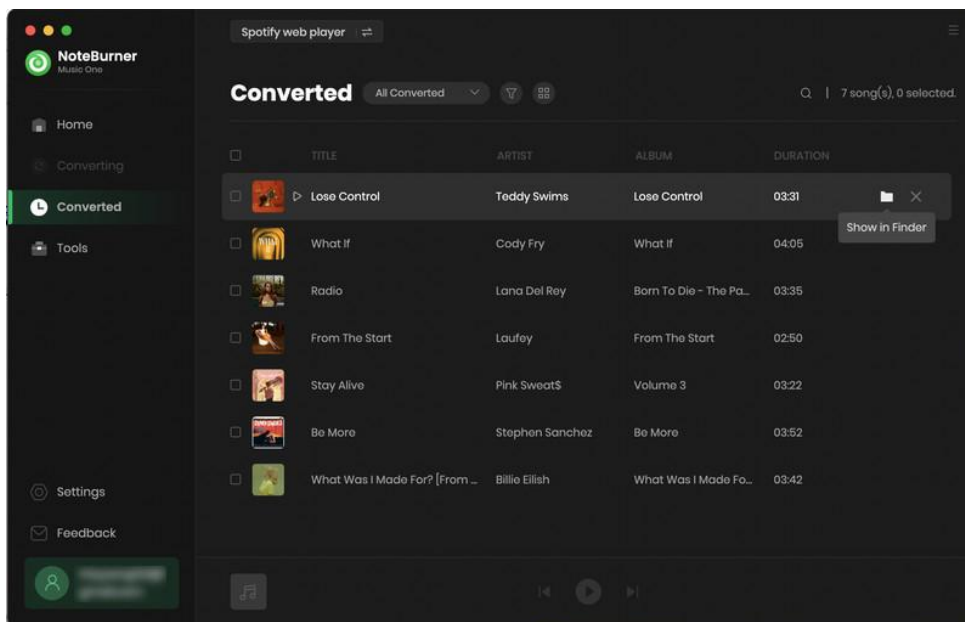

Find Converted Songs

When the conversion is done, you can browse the conversion history by clicking **"Converted"** on the left. Hovering over the song, and clicking the small **"Folder"** icon, then you'll be redirected to where the downloaded audio files locate.
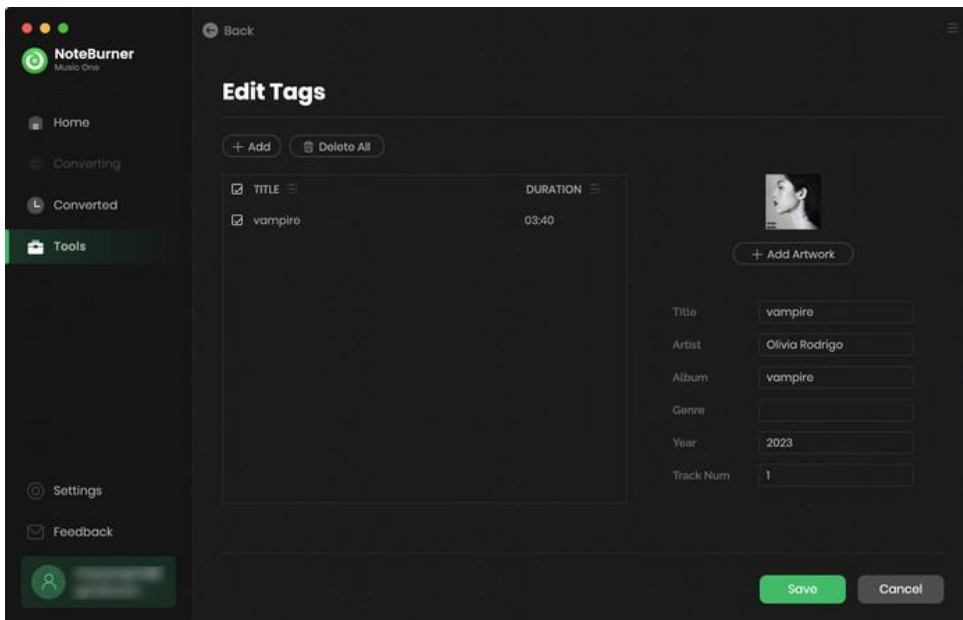

Edit ID3 Tags

The built-in Tags Editor help user organize the tag information of converted songs. Click "**Tools > Edit Tag**" and you're free to customize the metadata as needs.
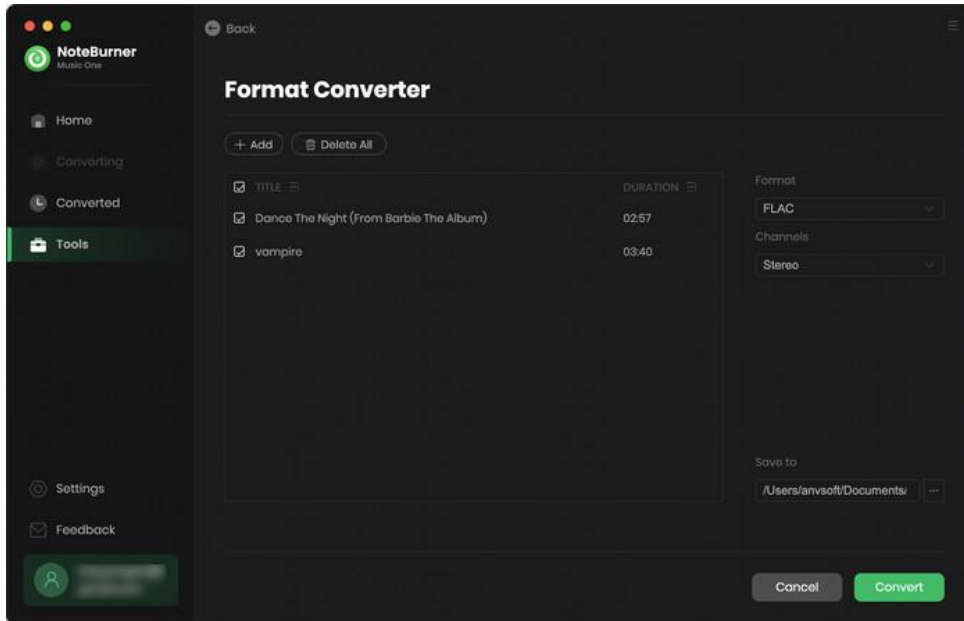

Convert Local Audio

NoteBurner also supports to convert your local music files to **MP3, M4A, FLAC, WAV, OGG, and AIFF**.

Click **"Tool > Format Converter"** and you will output the format you want.
Convert AA/AAX Audiobooks

In the toolbox, there's a paid tool - AA/AAX Converter, which is designed to convert your local aa or aax audiobooks to M4A, M4B or MP3 format easily.
